iQmetrix Integrates PreCash Cash Bill Payment Solution

Partnership Makes Cash Bill Payments Faster, Easier and More Accurate for RetailiQ Users

HOUSTON, (Mar. 17, 2009) — iQmetrix and PreCash today announced a partnership to integrate PreCash's cash bill payment services into the iQmetrix Retail Management Solution, RetailiQ, comprehensive retail management software for wireless dealers.

Integration of the PreCash bill payment solution into RetailiQ automates cash payment acceptance for RetailiQ users, making it faster, easier and more secure for them to sell wireless plans and services to cash-paying customers. Additionally, because RetailiQ handles all point-of-sale needs, processing cash bill payments is more efficient and accurate, creating a better experience for the customer.

"As a company that currently uses both the PreCash Cash Bill Pay service and RetailiQ, we are excited about this union and plan to be the first in line for these integrated services," said Jim Pack, Jr., President of PCS Partners, a large independent metroPCS authorized dealer. "In addition to making it easy for our employees to accept payments and avoid keying errors, this integrated product will help ensure our cash bill payments are securely reconciled. Plus, the integration will help us better track our customers' payment activity."

"Our clients now have a cash payment solution that can help add revenue and attract new business by making it easier, faster and more convenient for consumers without a credit card or bank account to pay their bills," says Christopher Krywulak, President & CEO, iQmetrix.

"Integrating PreCash's services into RetailiQ means our clients do not have to fumble between two systems to process cash bill payments, making these payments more accurate and helping them avoid entry errors that might cause difficulties in the back office, and the customer spends less time waiting for a transaction to complete."

"With access to PreCash's payment solutions, iQmetrix customers can accept cash payments for bills or deposits," says John Chaney, CEO, PreCash. "Cash payments can be accepted for more than 150 billers and service providers, including the most popular wireless providers like AT&T, metroPCS, Sprint, T-Mobile and Verizon. What's more, dealers can rest easy knowing that they have a cash payment solution that is Money Service Business Licensed in all 50 states."

-More-

The PreCash Bill Payment Service will be available to RetailIQ users early this summer. Representatives from both companies will be discussing this partnership in booth 5500 at the CTIA Wireless 2009 show in Las Vegas April 1-3.
